The mission of the CPHWD is to provide quality continuing education, training, and technical assistance to workers in occupational safety and health (OSH) and public health practice. The activities are designed to strengthen the cooperation between the Center for Public Health Workforce Development and state and local public health practitioners.

The Center for Public Health Workforce Development offers high quality continuing education programs through four federally sponsored component organizations: the New York/New Jersey Education and Research Center – Continuing Education Program (NIOSH); the Atlantic Center for Occupational Health and Safety Training (NIEHS); the Atlantic OSHA Training Center (USDOL); and the Region 2 Public Health Training Center (HRSA). Courses range in length from one to forty hours and address topics such as asbestos, lead abatement, hazardous waste, occupational safety, environmental health, and air pollution.
## TABLE OF CONTENTS

### 2 Welcome Letter from the Center Director
### 3 Faculty and Staff
### 4 Digital Badges
### 5 Certificate Programs
- Hazardous Materials and Waste Management Certificate Program
- Safety and Health Specialist Certificate Program
- General Industry Technical Specialist Certificate Program

### 9 Atlantic OSHA Training Center
- OSHA 10-Hour Training Program for the Construction Industry
- OSHA 30-Hour Training Program for the Construction Industry
- OSHA 510: Occupational Safety and Health Standards for the Construction Industry
- OSHA 511: Occupational Safety and Health Standards for General Industry
- Become an OSHA-Authorized Outreach Trainer
- OSHA 500: Trainer Course in Occupational Safety and Health Standards for the Construction Industry
- OSHA 501: Trainer Course in Occupational Safety and Health Standards for General Industry
- OSHA 502: Update for Construction Industry Outreach Trainers
- OSHA 503: Update for General Industry Outreach Trainers
- OSHA 504: Trainer Course in OSHA Standards for the Maritime Industry
- OSHA 5600: Disaster Site Worker Trainer
- OSHA 502: Update for Construction Industry Outreach Trainers
- OSHA 503: Update for General Industry Outreach Trainers
- OSHA 5402: Maritime Industry Trainer Update
- OSHA 5602: Update for Disaster Site Worker Trainer
- OSHA 521: OSHA Guide to Industrial Hygiene
- OSHA 2055: Cranes in Construction
- OSHA 2225: Respiratory Protection
- OSHA 2255: Principles of Ergonomics
- OSHA 2264: Permit-Required Confined Space Entry
- OSHA 3015: Excavation, Trenching, and Soil Mechanics
- OSHA 3085: Principles of Scaffolding
- OSHA 3095: Electrical Standards
- OSHA 3115: Fall Protection
- OSHA 7100: Introduction to Machinery and Machine Safeguarding
- OSHA 7115: Lockout/Tagout
- OSHA 7120: Introduction to Combustible Dust Hazards
- OSHA 7500: Introduction to Health and Safety Management

### 21 OSHA 7505: Introduction to Incident (Accident) Investigation
### 21 OSHA 7845: Recordkeeping Rule

### 22 Atlantic Center for Occupational Health and Safety Training (Atlantic COHST)
- 40-Hour Health and Safety for Hazardous Waste Personnel
- Remediation Strategies and Technologies for Environmental Contamination
- Annual Refresher on Health and Safety for Hazardous Waste Personnel
- Hazardous Materials Transportation
- Hazardous Waste Management-RCRA Training
- Supervisors of Hazardous Waste Operations
- Opioids and the Workplace: Prevention and Response
- Opioids in the Workplace Awareness

### 28 New York/New Jersey Occupational Safety and Health Center (NYNJERC)
- NIOSH (#043) Spirometry Training
- NIOSH (#043) Spirometry Refresher
- CAOHC-Approved Occupational Hearing Conservation Certification
- CAOHC-Approved Occupational Hearing Conservation Recertification
- New Jersey Lead Inspector and Risk Assessor Refresher
- New Jersey Lead Inspector and Risk Assessor Refresher
- Inspecting Buildings for Asbestos-Containing Materials (AHERA Inspector)
- Managing Asbestos in Buildings (AHERA Management Planner)
- Annual Refresher for AHERA Inspectors
- Annual Refresher for AHERA Management Planners
- New Jersey Asbestos Safety Technician
- Asbestos Safety Training for Custodial and Maintenance Personnel (Operations & Maintenance)
- Asbestos Operations and Maintenance Refresher
- Asbestos Safety Training for Contractors-Supervisors Refresher
- Asbestos Safety Training for Workers-Handlers Refresher

### 38 Earn a Master's Degree in Occupational Safety and Health (OSH)

### 39 Credit Statements

### 40 Instructors

### 42 Getting Here and Where to Stay

### 44 Registration Information

### 45 Enrollment Form
Dear Colleagues,

I am excited to have our 2023 course catalog for you! Many things have changed over the two years since our last Center course catalog was published. Like so many offices and organizations, when COVID started in March 2020 we were forced to pivot and reevaluate. We focused on adapting to new realities in order to continue providing the essential safety training that you needed more than ever. We've also welcomed a number of new staff members who have been instrumental in helping us achieve these goals.

We transitioned from only in-person training prior to March 2020, to virtual training through synchronous online platforms throughout the pandemic. We learned many valuable lessons in this time, and now we will continue to incorporate them into the way we conduct our trainings going forward. We learned that many trainees can and do effectively learn in online training. We found that many trainees also appreciate the convenience of online training, and in fact prefer online learning opportunities. We also know that a good number of our trainees still prefer to learn in-person. So moving forward, in order to meet the needs of everyone, we will provide three different types of courses: virtual synchronous, in-person, and hybrid, where certain days are online and others are in-person. The following key will help you determine course format throughout this catalog:

- = virtual
- = in-person
- = hybrid

We also started asynchronous online training programs, which are self-paced and can be completed at any time. Our first program is Opioids in the Workplace Awareness. You can complete this course at https://go.rutgers.edu/OpioidTraining. We are working to create additional courses that will be available anytime, anywhere, so you can learn on your own pace and at times that are convenient.

In two years some things haven't changed! We continue to offer essential courses that help keep workers safe, because this knowledge is needed now more than ever. When COVID-19 hit, our instructors provided critical expertise on in-demand areas like respiratory protection and workplace safety. With opioid deaths on the rise, we began providing training to address opiates in the workplace. Our half-day Opioids and the Workplace: Prevention and Response course provides evidence-based worker awareness training program that identifies workplace risk factors and solutions for opioid use, misuse, and addiction.

These past two years have been tumultuous, but they forced us to focus on what we do well—providing quality continuing education for professionals across pedagogical formats— and at the same time adapt to effectively reach the audiences who need it. We’re grateful that our virtual courses are now accessible to new audiences, including people previously unable to enroll in-person. Having students return in-person to our classrooms has been wonderful as well.

However you found us and this course catalog, whether you’ve been a regular in our courses, it’s been a few years, or you’re just discovering our offerings, we hope you’ll take advantage of the great courses we’re offering across all formats in 2023.

Whether it is in-person, online, or some combination of both, we look forward to seeing you in 2023!

WHAT IS A DIGITAL BADGE?

Digital badges record and recognize your professional development activities. Digital badges are a visual symbol of achievement. Digital badges include details of what you did to earn the badge, such as skills and competencies achieved, completion criteria, and standards to which the training applies.

You can add digital badges to your resume and professional networking sites (e.g. LinkedIn). Anyone can click on the badge to see what you did to earn it.

HOW DO I EARN A DIGITAL BADGE?

Digital badges are awarded by Rutgers University Division of Continuing Studies via Credly upon successful completion of select training programs offered through the Center for Public Health Workforce Development.

Requirements for successful completion vary by program.

If a digital badge is available for a course, that information will be listed in the course description on our website and in our course catalog.

When you successfully complete a course and earn your badge, you will receive a notification email from Credly.

HOW SOON WILL I GET MY DIGITAL BADGE?

For most programs, you will receive your digital badge within two weeks of course completion.

QUESTIONS ABOUT DIGITAL BADGES?

For more information, please contact Mitchel Rosen at mrosen@rutgers.edu or 732-235-9452.
The Hazardous Materials and Waste Management Certificate Program is designed to assist safety directors, supervisors, managers, environmental technicians, and workers involved in the handling, transport, and clean-up of hazardous materials, expand their knowledge of waste minimization and pollution prevention strategies.

**BENEFITS**

- Participate in hands-on training events related to hazardous materials operations
- Identify cost-effective measures to manage waste
- Reduce susceptibility to incidents
- Update knowledge of regulations related to hazardous materials and waste management

**5 REQUIRED COURSES**

- 40-Hour Health and Safety for Hazardous Waste Personnel
  OR
  Annual Refresher on Health and Safety for Hazardous Waste Personnel
- Hazardous Materials Transportation
- Hazardous Waste Management - RCRA Training
- Supervisors of Hazardous Waste Operations
- Remediation Strategies and Technologies for Environmental Contamination

**NOTE:**
With the exceptions of the 40-Hour Health and Safety for Hazardous Waste Personnel and Annual Refresher on Health and Safety for Hazardous Waste Personnel, all required courses must be completed at the Rutgers School of Public Health.
SAFETY & HEALTH SPECIALIST CERTIFICATE PROGRAM

- CONSTRUCTION
- GENERAL INDUSTRY

The certificate program is intended to give the health and safety professional comprehensive knowledge of workplace hazards and an understanding of OSHA regulatory standards. Trainees immediately apply what they have learned from these practical courses.

The Certificate will be awarded by the Atlantic OSHA Training Center (AOTC).

HOW IT WORKS

- Trainees may elect to concentrate in Construction or General Industry
- All courses that have been completed at Rutgers before applying for the certificate program, will count towards the certificate
- There is a $30 processing fee
OPTION 1: CONSTRUCTION SAFETY & HEALTH SPECIALIST CERTIFICATE

5 REQUIRED COURSES

☐ OSHA 510: Occupational Safety & Health Standards for the Construction Industry
☐ OSHA 3015: Excavation, Trenching, and Soil Mechanics
☐ OSHA 3115: Fall Protection
☐ OSHA 7500: Introduction to Safety and Health Management
☐ OSHA 7505: Introduction to Incident (Accident) Investigation

NOTE: 4 of 5 required courses must be taken at the Atlantic OSHA Training Center

CHOICE OF 3 ELECTIVE COURSES

☐ OSHA 2264: Permit-Required Confined Space Entry
☐ Inspecting Buildings for Asbestos-Containing Materials
☐ New Jersey Lead Inspector and Risk Assessor
☐ OSHA 2055: Cranes in Construction
☐ OSHA 3085: Principles of Scaffolding

NOTE: 2 of 3 elective courses must be taken at the Atlantic OSHA Training Center

OPTION 2: GENERAL INDUSTRY SAFETY & HEALTH SPECIALIST CERTIFICATE

5 REQUIRED COURSES

☐ OSHA 511: Occupational Safety & Health Standards for General Industry
 OR
☐ OSHA 503: Update for General Industry Outreach Trainers
☐ OSHA 521: OSHA Guide to Industrial Hygiene
☐ OSHA 2225: Respiratory Protection
☐ OSHA 7500: Introduction to Safety and Health Management
☐ OSHA 7100: Introduction to Machinery and Machine Safeguarding

NOTE: 4 of 5 required courses must be taken at the Atlantic OSHA Training Center

CHOICE OF 4 ELECTIVE COURSES

GROUP A (SELECT 2)

☐ OSHA 2255: Principles of Ergonomics
☐ OSHA 2264: Permit-Required Confined Space Entry
☐ OSHA 3095: Electrical Standards

GROUP B (SELECT 2)

☐ OSHA 7505: Introduction to Incident (Accident) Investigation
☐ OSHA 7845: Recordkeeping Rule
☐ OSHA 7120: Introduction to Combustible Dust Hazards

NOTE: 2 of 4 elective courses must be taken at the Atlantic OSHA Training Center
This week-long virtual program provides corporate managers, executives, and safety professionals an opportunity to attend courses which are essential in providing a safe work environment to their employees.

Utilizing a variety of instructional formats, these five (5) courses offered by the Atlantic OSHA Training Center (AOTC) provide an opportunity for practical instruction in safety concepts that today's professional manager needs.

Topics covered include safety awareness, effective record keeping (required by OSHA), elements of an emergency evacuation plan, tools to evaluate accidents and near misses, and effective management tools.

**5 REQUIRED COURSES**

- OSHA 7505: Introduction to Incident (Accident) Investigation
- OSHA 7845: Recordkeeping Rule
- OSHA 7115: Lockout/Tagout
- OSHA 7120: Introduction to Combustible Dust Hazards
- OSHA 7100: Introduction to Machinery and Machine Safeguarding

---

**DURATION:** 5 days

**COST:** $795

**2023 DATES:**

April 10 - 14 | VIRTUAL
AOTC is dedicated to promoting occupational safety and health through quality training. These authorized OSHA training programs assist workers in recognizing potential hazards on the job and encourage a more productive work environment. With an experienced and knowledgeable staff and state-of-the-art equipment, AOTC is able to:

• provide quality training developed by experts in the field;
• train workers on and off-campus;
• conduct trainings at the host’s convenience; and
• tailor courses to meet the host’s specific health and safety training needs.

The Atlantic OSHA Training Center (AOTC) is a collaboration between the Rutgers School of Public Health, Center for Public Health Workforce Development, located in Somerset, NJ; the State University of New York (SUNY) at Buffalo, Toxicology Research Center, located in Buffalo, NY; and Universidad Ana G. Mendez (UAGM), located in San Juan, Puerto Rico.

The Rutgers School of Public Health offers trainings on the New Brunswick/Piscataway campuses. Through our partnerships with SUNY Buffalo and UAGM, AOTC offers the OSHA Training Institute authorized and other courses throughout Region II (New York, New Jersey, Puerto Rico and the US Virgin Islands).
OSHA 10-HOUR TRAINING PROGRAM FOR THE CONSTRUCTION INDUSTRY

ABOUT: This 10-hour course provides instruction to entry level participants on a variety of construction industry safety and health standards. OSHA course completion cards will be issued to all participants who successfully complete the program.

AUDIENCE: Construction industry and building trades personnel, contractors, employers, union personnel and consultants

COURSE TOPICS:
- Introduction to OSHA Standard
- OSHA Act and General Duty Clause 5(a) (1), Subpart C: General Safety and Health Provisions, Competent Person
- Occupational health and safety environmental controls
- Hazard communication
- Personal protective equipment
- Fall protection
- Electrical safety
- Excavations
- Cranes, derricks, hoists, elevators and conveyers
- Motor vehicles and mechanized equipment

OSHA 30-HOUR TRAINING PROGRAM FOR THE CONSTRUCTION INDUSTRY

ABOUT: The OSHA 30-hour Construction Industry Outreach Training course is a comprehensive safety course designed for anyone involved in the construction industry, including safety directors and field supervisors. The program provides complete information on OSHA compliance issues. This training provides you with the knowledge and tools to recognize, evaluate, and control hazards found on construction sites.

AUDIENCE: Construction industry and building trades personnel, contractors, employers, union personnel, consultants, and personnel with safety responsibilities

COURSE TOPICS:
- Introduction to OSHA Standard
- OSHA Act and General Duty Clause 5(a) (1), Subpart C: General Safety and Health Provisions, Competent Person
- Occupational health and safety environmental controls
- Hazard communication
- Personal protective equipment
- Fall protection
- Electrical safety
- Excavations
- Cranes, derricks, hoists, elevators and conveyers
- Motor vehicles and mechanized equipment
- Concrete and masonry
- Confined space entry
- Steel erection
- Welding and hot work
- Fire prevention
- Inspection and abatement
- General safety and health
OSHA 510: OCCUPATIONAL SAFETY & HEALTH STANDARDS FOR THE CONSTRUCTION INDUSTRY

ABOUT: This course, for private sector personnel, covers OSHA policies, procedures and standards, as well as construction safety and health principles. Topics include scope and application of the OSHA construction standards. Special emphasis is placed on those areas that are the most hazardous, using OSHA standards as a guide.

Students must successfully pass a written exam at the end of the course.

This course is the required prerequisite for OSHA 500: Trainer Course in Occupational Safety and Health Standards for the Construction Industry.

TRAINEE FEEDBACK

Amazing instructor very knowledgeable would definitely take another class. Thank you!

OSHA 511: OCCUPATIONAL SAFETY & HEALTH STANDARDS FOR THE GENERAL INDUSTRY

ABOUT: This course, for private sector personnel, covers OSHA policies, procedures and standards, as well as general industry safety and health principles. Topics include scope and application of the OSHA general industry standards. Special emphasis is placed on those areas that are the most hazardous, using OSHA standards as a guide.

Students must successfully pass a written exam at the end of the course.

This course is the required prerequisite for OSHA 501: Trainer Course in Occupational Safety and Health Standards for General Industry.

TRAINEE FEEDBACK

I was nervous about doing this course all virtual for 8 hours a day. But [the instructor] did a great job keeping everyone engaged at all times.

DURATION: 4 days  
COST: $750  
PE Contact Hours: 26

2023 DATES:

Jan. 9 - 12 VIRTUAL
Mar. 20 - 23 IN-PERSON  
Nassau Community College  
Garden City, NY  
For registration, contact Donna Pesiri at Donna.Pesiri@ncc.edu  
(516) 572-7487 (ext. 25240)
Mar. 27 - 30 VIRTUAL
May 23 - 26 IN-PERSON
July 18 - 21 VIRTUAL
Sept. 19 - 22 VIRTUAL
Nov. 6 - 9 IN-PERSON

In-person courses are held at Rutgers Center for Public Health Workforce Development unless otherwise noted.
The OSHA Outreach Training Program is an integral part of occupational safety and health training. This voluntary program promotes workplace safety and health by educating participants on the recognition, abatement, and prevention of job-related hazards. OSHA Authorized Outreach Trainers deliver 10-hour and 30-hour outreach classes to make workers more knowledgeable about workplace hazards and their rights in the construction industry, general industry, maritime industry, and disaster site worker industry.

Individuals interested in becoming Authorized Outreach Trainers must meet the OSHA required industry specific safety experience requirements (through the OSHA Outreach Trainer Application process), successfully complete the 4-day prerequisite training course pertaining to the applicable OSHA standards, and successfully complete the corresponding 4-day OSHA outreach trainer course. The training prerequisites will not be waived by OSHA for any individual interested in this program. OSHA Authorized Outreach Trainers must successfully complete an update course in their specified industry every 4 years to maintain a current trainer authorization status.

FOR GENERAL INDUSTRY

PREREQUISITES

☐ 5 years of general industry safety experience

☐ OSHA 511: Occupational Safety & Health Standards for General Industry (certificate must be within 7 years of the 501 class date)

REQUIREMENTS

☐ OSHA 501: Occupational Safety & Health Standards for General Industry

NOTE: Authorization to train lasts for four years. Before the end of four years, you must take OSHA 503: Update for General Industry Outreach Trainers to renew your authorization for another four years.

FOR CONSTRUCTION INDUSTRY

PREREQUISITES

☐ 5 years of construction safety experience

☐ OSHA 510: Occupational Safety & Health Standards for the Construction Industry (certificate must be within 7 years of the 500 class date)

REQUIREMENTS

☐ OSHA 500: Occupational Safety & Health Standards for the Construction Industry.

NOTE: Authorization to train lasts for four years. Before the end of four years, you must take OSHA 502: Update for Construction Industry Outreach Trainers to renew your authorization for another four years.
OSHA 500: TRAINER COURSE IN OCCUPATIONAL SAFETY AND HEALTH STANDARDS FOR THE CONSTRUCTION INDUSTRY

ABOUT: This course is designed for personnel in the private sector interested in teaching the 10 and 30-hour construction safety and health outreach programs to their employees and other interested groups.

Special emphasis is placed on those topics that are required in the 10 and 30-hour programs, as well as on those that are the most hazardous, using OSHA standards as a guide.

Course participants are briefed on effective instructional approaches and the use of visual aids and handouts. This course allows the student to become a trainer in the Outreach Program and to conduct both a 10 and 30-hour construction safety and health course and to issue cards to participants verifying course completion.

PREREQUISITES: OSHA 510 and 5 Years Construction Safety Experience

REGISTRATION NOTE: Registration in trainer courses is pending review of an applicant’s prerequisites.

To apply for registration, please e-mail your name, course you wish to register for, course date, and a completed Prerequisite_Verification_Form (available on our website) to TrainerVerification@sph.rutgers.edu.

Your course registration is not complete until confirmed by Rutgers.
OSHA 501: TRAINER COURSE IN OCCUPATIONAL SAFETY AND HEALTH STANDARDS FOR GENERAL INDUSTRY

ABOUT: This course is designed for personnel in the private sector interested in teaching the 10 and 30-hour general industry safety and health outreach programs to their employees and other interested groups.

Special emphasis is placed on those topics that are required in the 10 and 30-hour programs, as well as on those that are the most hazardous, using OSHA standards as a guide.

Course participants are briefed on effective instructional approaches and the use of visual aids and handouts. This course allows the student to become a trainer in the Outreach Program and to conduct both a 10 and 30-hour general industry safety and health course and to issue cards to participants verifying course completion.

Students in the OSHA 501 training must have proficiency with computer presentation software and be able to successfully develop and deliver an in-class presentation on an assigned topic to the satisfaction of the course instructor in order to pass the class. Students must also pass a written examination at the end of the course. Outreach trainers are required to attend an OSHA 503 at least once every four years, prior to their authorization expiration date, in order to maintain their outreach trainer status.

PREREQUISITES: OSHA 511 and 5 Years General Industry Safety Experience

OSHA 5400: TRAINER COURSE IN OSHA STANDARD FOR THE MARITIME INDUSTRY

ABOUT: This course is designed for personnel interested in teaching the OSHA 10 and 30-hr Maritime Outreach courses. Special emphasis is placed on those topics that are required in the outreach program as well as on those areas that are most hazardous. Various instructional approaches and the effective use of visual aids and handouts will also be provided. Students are expected to facilitate a presentation and pass a written exam.

Students must have proficiency with computer presentation software and be able to successfully develop and deliver an in-class presentation on an assigned topic to the satisfaction of the course instructor in order to pass the class. Students must also pass a written examination at the end of the course. Outreach trainers are required to attend an OSHA 5402 at least once every four years, prior to their authorization expiration date, in order to maintain their outreach trainer status.

PREREQUISITES: OSHA 5410: Occupational Safety and Health Standards for the Maritime Industry and five years of maritime industry safety experience. A bachelor or higher college degree in occupational safety and health or industrial hygiene by an accredited college or university, a certified marine chemist (CMC) or Certified Industrial Hygienist (CIH) designation may be substituted for two years of experience.
OSHA 5600: DISASTER SITE WORKER TRAINER

ABOUT: The OSHA 5600 Disaster Site Worker Trainer prepares experienced trainers to present OSHA’s 15 and 7.5-hour Disaster Site Worker Course. Trainers for this course need to be able to apply the elements of successful adult training programs, along with specific knowledge, skills and attitudes, to awareness training about safety and health hazards at natural and man-made disaster sites.

Trainers are given the opportunity to practice knowledge, skills, and attitudes through discussion, planned exercises, demonstrations, and presentations. Participants receive lesson plans and training materials for the Disaster Site Worker Course, as well as information on training techniques and resources. Trainers will be expected to present a selected portion of the Disaster Site Worker Course and to use a “presentation evaluation” sheet to evaluate other presenters. Outreach trainers are required to attend OSHA 5602 at least once every four years.

Participants will be required to develop and present a training module in class.

PREREQUISITES: OSHA 500 or OSHA 501 and 40-Hour Health and Safety for Hazardous Waste Site Personnel

OSHA 502: UPDATE FOR CONSTRUCTION INDUSTRY OUTREACH TRAINERS

ABOUT: This course is designed for personnel in the private sector who have completed OSHA 500 Occupational Safety and Health Standards for the Construction Industry and who are active trainers in the Outreach Program. It provides an update on such topics as OSHA construction standards, policies and regulations. You must have a current Construction Trainer Card to enroll.

PREREQUISITE: OSHA 500: Trainer Course in Occupational Safety and Health Standards for the Construction Industry

DURATION: 4 days
COST: $825
2023 DATES:
July 31 - Aug. 3  IN-PERSON

DURATION: 3 days
COST: $695
2023 DATES:
Jan. 11 - 13  VIRTUAL
Feb. 13 - 15  IN-PERSON
Nassau Community College, Garden City, NY
For registration, contact Donna Pesiri at Donna.Pesiri@ncc.edu
(516) 572-7487 (ext. 25240)
Mar. 7 - 9  VIRTUAL
April 24 - 26  IN-PERSON
May 9 - 11  VIRTUAL
July 12 - 14  IN-PERSON
Aug. 9 - 11  VIRTUAL
Oct. 24 - 26  VIRTUAL
Dec. 11 - 13  VIRTUAL

In-person courses are held at Rutgers Center for Public Health Workforce Development unless otherwise noted.
OSHA 503: UPDATE FOR GENERAL INDUSTRY OUTREACH TRAINERS

ABOUT: This course is designed for personnel in the private sector who have completed OSHA 501: Occupational Safety and Health Standards for General Industry and who are active trainers in the Outreach Program. It provides an update on such topics as OSHA general industry standards, policies and regulations. You must have a current General Industry Trainer Card to enroll.

PREREQUISITES: OSHA 501: Trainer Course in Occupational Safety and Health Standards for General Industry

OSHA 5402: MARITIME INDUSTRY TRAINER UPDATE

ABOUT: This course is designed for personnel in the private sector who have completed the OSHA 5400 Occupational Safety and Health Standards for the Maritime Industry and who are active trainers in the Outreach Program. It provides an update on such topics as OSHA Maritime Standards, policies and regulation.

PREREQUISITES: OSHA 5400: Occupational Safety and Health Standards for the Maritime Industry

OSHA 5602: UPDATE FOR DISASTER SITE WORKER TRAINER

ABOUT: This course is intended to update authorized disaster site worker trainers with new technical and regulatory information related to disaster response. In addition, participants will have the opportunity to share “lessons learned” and refresh knowledge about various topics. Active trainers are required to complete OSHA 5602 at least once every four years.

Students will discuss provisions of National Response Framework that allow occupational safety & health to be integrated into disaster response. They will also identify unique occupational safety & health hazards, response activities and decontamination methods for specific types of disasters.

PREREQUISITES: Attendees are required to take OSHA 5600: Disaster Site Worker Trainer course and submit proof of completion prior to enrollment.
OSHA 521: OSHA GUIDE TO INDUSTRIAL HYGIENE

ABOUT: This course, for private sector personnel, covers industrial hygiene practices and related OSHA regulations and procedures. Topics include permissible exposure limits, OSHA health standards, respiratory protection, engineering controls, hazard communication, workplace program elements, OSHA sampling procedures and strategy and other industrial hygiene topics. Course highlights include workshops in health hazard recognition, OSHA health standards and a safety and health program workshop.

2023 DATES:
- June 26 - 29 IN-PERSON
- Oct 10 - 13 IN-PERSON

In-person courses are held at Rutgers Center for Public Health Workforce Development unless otherwise noted.

OSHA 2055: CRANES IN CONSTRUCTION

ABOUT: This course covers the requirements for operation of cranes in the construction industry using the OSHA construction Cranes and Derricks Standard as a guide. Course topics include hazards associated with crane assembly and disassembly, types of cranes, lifting concepts, rigging and wire rope, signaling, employee qualifications and training, and maintenance, repair, and inspection requirements. Students will participate in workshops to reinforce concepts of safe crane operation.

Upon course completion students will have the ability to identify the types of cranes and their components and attachments, determine safe operating conditions, and recognize common violations of OSHA Standards.

OSHA 2225: RESPIRATORY PROTECTION

ABOUT: This course covers the requirements for the establishment, maintenance, and monitoring of a respirator program. Topics include terminology, OSHA standards, NIOSH certification and medical evaluation recommendations. Course highlights include workshops on respirator selection, qualitative fit testing and the use of a large array of respiratory and support equipment for hands-on training.

2023 DATES:
- April 3 - 6 HYBRID
  (Days 1 - 3 are virtual and Day 4 is in-person at Rutgers Center for Public Health Workforce Development)
### OSHA 2255: PRINCIPLES OF ERGONOMICS

**ABOUT:** This course covers the use of ergonomic principles to prevent musculoskeletal disorders. Topics include anthropometry, video display terminals, work physiology, musculoskeletal disorders and risk factors such as vibration, temperature, material handling, repetition and lifting and transfers in health care.

The course features case studies covering analysis and design of work stations and equipment, laboratory sessions in manual lifting and coverage of current OSHA compliance policies.

**DURATION:** 3 days  
**COST:** $750  
**2023 DATES:** May 31 - June 2 **IN-PERSON**

In-person courses are held at Rutgers Center for Public Health Workforce Development unless otherwise noted.

### OSHA 2264: PERMIT-REQUIRED CONFINED SPACE ENTRY

**ABOUT:** This course enables students to recognize, evaluate, control and abate safety and health hazards associated with permit-required confined space entry. The course focuses on the specific requirements of 29 CFR 1910.146 (a) through (l) and 29 CFR 1926.1200. The standards are discussed with references to the OSHA directive, letters of interpretation and preamble rationale. Technical topics include the recognition of confined space hazards, basic information about instrumentation used to evaluate atmospheric hazards and general permit space ventilation techniques. The course features workshops on confined space classification, permits, and program evaluation.

**DURATION:** 3 days  
**COST:** $675  
**PE Contact Hours:** 19.5  
**2023 DATES:** Feb. 15 - 17 **HYBRID**  
Oct. 18 - 20 **HYBRID**

(Days 1 - 2 are virtual and Day 3 is in-person at Rutgers Center for Public Health Workforce Development)

### OSHA 3015: EXCAVATION, TRENCHING, AND SOIL MECHANICS

**ABOUT:** This course focuses on OSHA standards related to excavation, trenching, and soil mechanics. Students are introduced to practical soil mechanics and its relationship to the stability of shored and unshored slopes and walls of excavations. Various types of shoring (wood timbers and hydraulic) are covered. Testing methods are demonstrated and a half-day field exercise is conducted, allowing students to use instruments such as penetrometers, torvane shears and engineering rods.

**DURATION:** 3 days  
**COST:** $675  
**PE Contact Hours:** 19.5  
**2023 DATES:** Feb. 20 - 22 **HYBRID**

(Days 1 - 3 are virtual and Day 4 is in-person at Rutgers Center for Public Health Workforce Development)
OSHA 3085: PRINCIPLES OF SCAFFOLDING

ABOUT: This course covers the requirements for the safe construction and use of scaffolding using the OSHA construction scaffold standard as a guide. Course topics include hazards associated with scaffold design, assembly, disassembly and use, types of scaffolds, determining scaffold capacity, employee qualifications and training, and maintenance, repair, and inspection requirements. Students will participate in workshops to reinforce concepts of safe scaffolding. Upon course completion students will have the ability to identify the types of scaffolds and their components, determine safe assembly, use, and disassembly, and recognize common violations of OSHA Standards.

OSHA 3095: ELECTRICAL STANDARDS

ABOUT: This course is designed to provide the student with a survey of OSHA’s electrical standards and the hazards associated with electrical installations and equipment. Topics include single and three phase systems, cord- and plug-connected and fixed equipment, grounding, ground fault circuit interrupters, and safety-related work practices. Emphasis is placed on electrical hazard recognition and OSHA inspection procedures. Hands-on training is provided using various types of electrical test equipment.

OSHA 3115: FALL PROTECTION

ABOUT: This course provides participants with an overview of state-of-the-art technology for fall protection and current OSHA requirements, including the principles of fall protection, the components of fall arrest systems, the limitations of fall arrest equipment, and OSHA policies regarding fall protection. Students will identify various types of fall protection and their components; recognize fall hazards and identify abatement methods for fall hazards; define the proper use of fall protection equipment and personal fall arrest systems; and select proper standards for citation purposes.

OSHA 7100: INTRODUCTION TO MACHINERY AND MACHINE SAFEGUARDING

ABOUT: This course increases the participant’s knowledge and skills in proper machine safeguarding techniques and highlights the benefits of guarding various types of machinery. Specific areas include: an introduction to machinery and machine-safeguarding, basics of machine safeguarding, methods of safeguarding and management responsibilities.

NOTE: This course is the final course in the 5-day General Industry Technical Specialist Certificate Program (see page 8).
OSHA 7115: LOCKOUT/TAGOUT

ABOUT: This course features how to identify and evaluate the various types of energy sources in the workplace. Participants will be able to list and describe the training and communication requirements for authorized, affected, and other employees. Periodic inspection and audit parameters will be described. Case studies and how to identify violations of Lockout and Tagout requirements will be reviewed.

At the conclusion of this course, trainees will be able to determine their companies’ Lockout/Tagout compliance issues based on OSHA’s 1910.147 Subpart J: Control of Hazardous Energy.

NOTE: This course is the third course in the 5-day General Industry Technical Specialist Certificate Program (see page 8).

OSHA 7120: INTRODUCTION TO COMBUSTIBLE DUST HAZARDS

ABOUT: The focus of this course is to recognize the hazards of combustible dust, which may be found throughout the manufacturing and utility sectors where these hazards continue to go unrecognized and have become the focus of an OSHA National Emphasis Program.

Students will learn to identify, evaluate and control combustible dust risks in the workplace; learn administrative and engineering best practices to prevent accidents; review legislation and regulations and recognize work practices and guidelines that reduce the potential for a combustible dust explosion.

NOTE: This course is the fourth course in the 5-day General Industry Technical Specialist Certificate Program (see page 8).
OSHA 7500: INTRODUCTION TO SAFETY & HEALTH MANAGEMENT

ABOUT: The focus of this course is the effective implementation of a company’s safety and health management system. The workshop addresses the four core elements (Management Leadership and Employee Involvement, Worksite Analysis, Hazard Prevention and Control, and Safety and Health Training) of an effective safety and health system and those central issues that are critical to each element's proper management.

OSHA 7505: INTRODUCTION TO INCIDENT (ACCIDENT) INVESTIGATION

ABOUT: This course provides an introduction to basic incident investigation procedures and describes accident analysis techniques. The goal of the course is to help participants gain the basic skills necessary to conduct an effective incident investigation at their workplace.

The target audience is small employers, managers, employees or employee representatives who, as part of a firm's safety and health system, would be involved in conducting accident and/or near-miss investigations.

NOTE: This course is the first course in the 5-day General Industry Technical Specialist Certificate Program (see page 8).

OSHA 7845: RECORDKEEPING RULE

ABOUT: This course is designed to assist employers in identifying and fulfilling their responsibilities for posting certain records, maintaining records of illnesses and injuries, and reporting specific cases to OSHA. Employees of the private sector companies who have responsibilities under OSHA's revised record keeping Rule 29CFR1904, for reporting, will benefit from attending this course.

Students will identify employers and employees covered under OSHA's revised record keeping standards; identify new OSHA requirements for record keeping, posting, and reporting; learn how to complete the OSHA Forms 300, 300A, and 301; and identify OSHA’s accident and injury log posting requirements.

NOTE: This course is the second course in the 5-day General Industry Technical Specialist Certificate Program (see page 8).
The Atlantic Center for Occupational Health and Safety Training (Atlantic COHST) was established in 1987 by the National Institute of Environmental Health Sciences (NIEHS) to provide comprehensive, quality health and safety training for the wide variety of employees potentially exposed to hazardous waste. Over 500,000 workers have received training through this center.

The Center has assembled an expert team of health and safety specialists, industrial hygienists, occupational physicians and trainers with extensive experience in waste site, industrial and emergency response operations.

OSHA encourages employers to participate in training programs that have been recognized by NIEHS through its training grants program. The Center’s courses are partially supported by NIEHS through cooperative agreement number 5U45 ESO6179.
40-HOUR HEALTH AND SAFETY FOR HAZARDOUS WASTE PERSONNEL

ABOUT: Eighteen hours of hands-on training, lectures and in-depth discussions assist students in complying with OSHA and CERCLA regulations, which require a minimum of 40 hours of off-site initial health and safety instruction for all those involved in hazardous waste operations. This course satisfies regulations under RCRA that mandate 40-hour training for major corrective actions and hazardous waste operations designated for cleanup by state or local governments. Students gain knowledge in: categories of hazards relating to hazardous waste site health and safety; interpreting data from air monitoring instruments; and basic approaches to conducting activities at hazardous waste sites.

AUDIENCE: Private and public sector engineers, technicians and those who conduct site investigations and feasibility studies.

FEATURES:
• Hazard Recognition and Evaluation
• Basics of Toxicology
• Personal and Respiratory Protective Equipment/Clothing
• Site Investigation and Control
• Decontamination
• Confined Space Entry

TRAINEE FEEDBACK

Course was great. The instructor did an amazing job over zoom and in-person.

REMEDIATION STRATEGIES AND TECHNOLOGIES FOR ENVIRONMENTAL CONTAMINATION

ABOUT: This class is designed to increase participant knowledge of techniques used for monitoring, remediating, and managing contaminated sites. Students will have an opportunity to review federal regulatory frameworks: safe drinking water act (SDWA), Toxic Substance Control Act (TSCA), and the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) and identify how they fit into managing remediation technologies.

AUDIENCE: Facility personnel who oversee monitoring and remediating at contaminated sites.

FEATURES:
• Review federal regulatory framework for site cleanup
• Current remediation techniques
• Benefits and limitations of available products for remediation

ANNUAL REFRESHER ON HEALTH AND SAFETY FOR HAZARDOUS WASTE PERSONNEL

ABOUT: A combination of lectures, group exercises, and a selected case study provides students with the eight hours of refresher training required annually by OSHA for all employees involved in hazardous waste operations. Course participants will gain knowledge in new regulations or incidents that have had an impact on the hazardous waste industry and current activities at an active Superfund site.

AUDIENCE: Individuals who have successfully completed a 40-hour Health and Safety for Hazardous Waste Site Personnel.

FEATURES:
- Employee rights and remedies
- Hazard recognition and evaluation
- Chemical protective clothing
- Respiratory protective equipment
- Site investigation and characterization
- Decontamination
- Emergency response
- Medical surveillance programs

REGISTRATION NOTE: A copy of a 40-hour course certificate must be provided with registration.

HAZARDOUS MATERIALS TRANSPORTATION

ABOUT: This course is designed to provide federally-mandated training to those who deal with all phases of hazardous materials or hazardous waste in transportation. It provides the information necessary to properly prepare and handle these materials during transportation. In addition to lecture and discussion, students will participate in a hands-on document preparation workshop. This course complies with the training requirements of 49 CFR 172.700–172.704.

AUDIENCE: This course is designed for employees who handle, load or unload hazardous materials; prepare hazardous materials for transportation; are responsible for transporting hazardous materials; or operate a vehicle used to transport hazardous materials.

FEATURES:
- Hazard classification
- Shipping containers
- Labeling/placarding requirements
- Shipping papers
- Cargo Preparation
- Motor carrier responsibilities and liabilities
- Transportation emergencies

TRAINEE FEEDBACK

As always, a great experience. Been coming here 30 years with no intention to quit now!
HAZARDOUS WASTE MANAGEMENT – RCRA TRAINING

ABOUT: This course assists employees in understanding the waste management requirements of the Resource Conservation and Recovery Act (RCRA). Employees that deal with hazardous waste in the workplace under normal and emergency conditions should participate in this class to understand how RCRA applies to the hazardous waste being created in their workplace.

AUDIENCE: Facility personnel who oversee hazardous material generation, storage, and disposal.

FEATURES:
• An in-depth definition of hazardous waste
• Emergency procedures
• Hazardous waste manifests
• Labeling
• Waste storage
• Transportation and packaging of waste

NOTE: This course complies with the requirement for annual training as required by the USEPA for RCRA.

2023 DATES:
Mar. 28  VIRTUAL
Nov. 7  IN-PERSON

In-person courses are held at Rutgers Center for Public Health Workforce Development unless otherwise noted.

Instructor was very knowledgeable and able to answer questions with examples.
SUPERVISORS OF HAZARDOUS WASTE OPERATIONS

ABOUT: In addition to the 40 hours of initial off-site health and safety instruction for all employees involved in hazardous waste operations, OSHA requires at least eight hours of specialized training for supervisors. This course satisfies OSHA requirements under 29 CFR 1910.120.

Participants gain knowledge in management of personal protective equipment programs; development of health and safety plans; and supervisory skills, including management style and effective communication.

AUDIENCE: Private and public sector managers and supervisors who administrate employees engaged in, or directly responsible for, hazardous waste operations.

FEATURES:
• The Supervisor’s role
• Employee training
• Legal issues
• Medical surveillance programs
• Respiratory protection programs
• Confined space entry regulations
• Developing site safety and health plans

REGISTRATION NOTE: A copy of a 40-hour course certificate must be provided with registration.
OPIOIDS AND THE WORKPLACE: PREVENTION AND RESPONSE

ABOUT: The goal of the course is to provide an evidence-based worker awareness training program that identifies workplace risk factors and solutions for opioid use, misuse, and addiction.

Upon completing this course, participants will be able to:

• Discuss the scope and severity of the opioid crisis
• Summarize the relationship between workplace injuries and illnesses, working conditions, and opioid use disorder
• Identify risks of occupational exposure and potential steps for prevention and response
• List actions that might be taken at the workplace to prevent and respond to opioid use, misuse, and addiction

AUDIENCE: Workers and employers who may be impacted by the opioid crisis.

DURATION: 1/2 day
COST: Free
2023 DATES: To be announced. Please visit our website for course dates and times or call (732) 235-9450

TRAINEE FEEDBACK
Instructors were excellent and the course material was very informative.

OPIOIDS IN THE WORKPLACE AWARENESS

ABOUT: The goal of the course is to provide an 1-hour awareness training program that identifies workplace risk factors and solutions for opioid use, misuse, and addiction.

AUDIENCE: Workers and employers who may be impacted by the opioid crisis.

DURATION: 1 hour
COST: Free
2023 DATES: Available online anytime at go.rutgers.edu/OpioidTraining

PREVENT OVERDOSE DEATHS

Despite progress, drug overdose deaths continue to impact our nation.

NEARLY 92,000 IN 2020

• The majority involved a prescription or illicit opioid.
• Taking more than one drug at the same time can increase overdose risk.

www.cdc.gov

Not all overdoses have to end in death.

Everyone has a role to play.

• Learn about the risks of opioids.
• Learn about naloxone, its availability, and how to use it.
• Help people struggling with opioid use disorder find the right care and treatment.

(p) 732-235-9450 | rutgerstraining.sph.rutgers.edu | rutgerstraining@sph.rutgers.edu | 27
The New York/New Jersey Occupational Safety & Health Center is one of eighteen National Institute for Occupational Safety and Health (NIOSH)-sponsored Educational and Research Centers (ERCs) located at universities throughout the United States. The ERCs, which were established in 1977 in response to the Occupational Safety and Health Act, are sponsored by NIOSH to provide undergraduate, graduate and continuing education and outreach for occupational safety and health professionals.

These include industrial hygienists, occupational health nurses, occupational physicians and safety engineers, as well as individuals in related disciplines.

NYNJERC is a consortium of five institutions in New York and New Jersey, and serves New York, New Jersey, Puerto Rico and the US Virgin Islands. The consortium is made up of Icahn School of Medicine at Mount Sinai, CUNY School of Public Health, New Jersey Institute of Technology, NYU Langone Medical Center, NYU Rory Meyers College of Nursing, and Rutgers School of Public Health.

SAVE THE DATE THE 44TH ANNUAL NYNJERC SCIENTIFIC MEETING

FEBRUARY 10, 2023

The New York/New Jersey Education and Research Center (NYNJERC) Annual Scientific Meeting features topics of current scientific interest as identified by members of the consortium management committee.

Leaders in occupational safety and health from academia, industry, labor, professional associations and government are invited to present their current research and particular viewpoints in relation to the topic of choice.

www.nynjerc.org
**NIOSH-APPROVED (#043) SPIROMETRY TRAINING**

**ABOUT:** This course uses small groups, lectures, demonstrations, audiovisual instruction and individual practice to provide students with the skills to administer spirometry testing in the occupational setting or elsewhere.

A two-part examination (written and practical) is issued to verify competency. Certificates will be given for successful completion with a grade of 70% or better in each part of the exam. Additional tutoring and exam retake fee is $375.

**AUDIENCE:** Occupational health nurses and physicians, safety professionals and health technicians or other personnel involved in the performance and/or interpretation of spirometry tests.

**FEATURES:**
- Medical surveillance programs
- Requirements of effective pulmonary screening and assessment
- Graphic measurement techniques
- Techniques for forced vital capacity maneuver
- Interpretation of the spirogram
- Rationale for pulmonary function testing
- Anatomy and physiology related to pulmonary function testing

**NIOSH-APPROVED (#043) SPIROMETRY REFRESHER**

**ABOUT:** This one-day refresher course is required for those who wish to maintain a valid NIOSH-Approved Spirometry Training Certificate. This course will provide attendees with the opportunity to discuss problems not foreseen during initial spirometry training.

**AUDIENCE:** Occupational health nurses and physicians, safety professionals and health technicians or other personnel involved in the performance and/or interpretation of spirometry tests.

**FEATURES:**
- Spirometry testing indicators
- American thoracic society standards for pulmonary function testing
- Latest techniques for identifying true changes in lung function
- Review of flow volume loops
- Categorization of type and degree of impairment
- Indications for spirometry testing in an occupational health setting

**REGISTRATION NOTE:** Your registration is not complete until we receive a copy of your NIOSH - Approved Spirometry Training certificate. The expiration on all certificates is 5 years from the course date and there is a 7 month Grace Period from the date of expiration. Individuals who are past 5 years and 7 months must retake an initial NIOSH-Approved Spirometry Training Course.

The instructor was wonderful! He made the curriculum easy to understand and applicable to our occupations.
CAOHC-APPROVED OCCUPATIONAL HEARING CONSERVATION CERTIFICATION

ABOUT: This course is designed to train the student in the administrative, technical, and practical aspects of an industrial hearing conservation program. The course combines tutorial discussions with practical applications, and meets the requirements for certification from the Council for Accreditation in Occupational Hearing Conservation (CAOHC).

Certification must be renewed every five years. Students must pass an exam with 70% or better to receive a certificate of course completion and CAOHC certification.

AUDIENCE: Occupational and environmental health nurses and physicians and occupational safety and health professionals who require certification in occupational hearing conservation.

FEATURES:
• Understanding state and federal regulations (OSHA)
• Physics of sound
• Anatomy, physiology and pathology of the ear
• Implementing a hearing conservation program
• Audiometric testing
• Noise measurement and hearing protection

NOTE: Your CAOHC certification fee has been included in the price of this course. Students must be paid in full 4 weeks prior to the course date in order to be considered enrolled and to receive the course materials.

DURATION: 2.5 days
COST: $685
PE Contact Hours: 21.0

2023 DATES:
To be announced. Please visit our website or call (732) 235-9450 for course dates and times.

CAOHC-APPROVED OCCUPATIONAL HEARING CONSERVATION RECERTIFICATION

ABOUT: This course provides an update, review and practicum in occupational hearing conservation, meeting requirements for recertification from the Council for Accreditation in Occupational Hearing Conservation (CAOHC).

Students must pass an exam with 70% or better to receive a certificate of course completion and CAOHC recertification. Certification must be renewed every five years.

AUDIENCE: Occupational and environmental health nurses and physicians and occupational safety and health professionals who require recertification in occupational hearing conservation.

FEATURES:
• Review of anatomy and physiology of the ear
• Updates on OSHA regulations
• Workers’ Compensation considerations
• Hearing protection
• Update on the newest equipment and technology

NOTE: Students must provide a valid CAOHC certification number and expiration date at the time of registration. Expired certifications must be accompanied by a valid CAOHC extension in writing. Your CAOHC certification fee is included in the price of this course.

Students must be paid in full 4 weeks prior to the course date in order to be considered enrolled and to receive the course materials.

DURATION: 1 day
COST: $465
PE Contact Hours: 8.0

2023 DATES:
To be announced. Please visit our website or call (732) 235-9450 for course dates and times.
NEW JERSEY LEAD INSPECTOR AND RISK ASSESSOR

ABOUT: This five-day course presents the legal and technical issues and obligations of lead inspection and risk assessment. Using class lectures and discussions, the demonstration of modern XRF technology and individual hands-on experience, the focus is on state-of-the-art methods for determining lead in paint, soil and dust. Course materials include HUD Guidelines, an EPA-approved curriculum and Federal and New Jersey regulations.

AUDIENCE: Health department inspectors, housing authority officials, engineers, real estate professionals, industrial hygienists, environmental consultants, safety professionals, and XRF operators.

FEATURES:
- Federal, state and local regulations
- Dust and soil sampling protocols
- Health/safety concerns and legal issues
- Risk assessment methods
- Lead abatement planning/execution
- Inspection and testing methods
- X-Ray fluorescence analyzers
- Reports and record keeping

DURATION: 5 days
COST: $850
CEs: 33.50

2023 DATES:
Jan. 9 - 13  IN-PERSON
April 17 - 21 IN-PERSON
Dec. 4 - 8   IN-PERSON
In-person courses are held at Rutgers Center for Public Health Workforce Development unless otherwise noted.

NEW JERSEY LEAD INSPECTOR AND RISK ASSESSOR REFRESHER

ABOUT: Refresher training for persons who have completed the Lead Inspector and Risk Assessor course is required every two years to maintain accreditation. This 8-hour course consists of topics designed to update the skills and knowledge necessary to perform job tasks and functions associated with certification. Students must successfully pass a written exam at the end of the course.

FEATURES:
- Overview of key health and safety
- Respiratory protection programs and practices
- Medical surveillance programs and practices
- Update on federal, state or local regulations
- Training for new technologies and abatement procedures

NOTE: Students must bring NJ Lead Inspector Risk Assessor permit to class. Refresher should be taken every 2 years.

DURATION: 1 day
COST: $175
CEs: 3.0

2023 DATES:
Mar. 22  IN-PERSON
May 1    IN-PERSON
Dec. 13  VIRTUAL
In-person courses are held at Rutgers Center for Public Health Workforce Development unless otherwise noted.
INSPECTING BUILDINGS FOR ASBESTOS-CONTAINING MATERIALS (AHERA INSPECTOR)

ABOUT: This course combines lecture, discussion and hands-on experience to accredit inspectors as per AHERA regulations (40 CFR 763) and the ASHARA Reauthorization Act. Accreditation is mandatory for anyone conducting asbestos inspections of schools and “public and commercial” buildings. This course also satisfies the training requirements for the New York State Restricted Asbestos Handler III (Inspector) and NYC Investigator. Students must earn a grade of 70% or better on the AHERA accrediting examination to receive a certificate of course completion. Those passing the exam will receive photo identification as AHERA accredited inspectors.

AUDIENCE: Those seeking AHERA accreditation for conducting building inspections for the presence of asbestos-containing materials.

FEATURES:
• Types and uses of asbestos
• Health effects of exposure
• Regulatory framework and legal liabilities
• Pre-Inspection planning
• Inspecting and assessing ACM
• Building systems and plans
• Personal protective equipment
• Data interpretation
• Inspection walk-through
• Bulk sampling workshop
• Record keeping/inspection reports

DURATION: 3 days
COST: $595
PE Contact Hours: 19.5

2023 DATES:
June 5 - 7  IN-PERSON
Oct. 16 - 18  IN-PERSON

In-person courses are held at Rutgers Center for Public Health Workforce Development unless otherwise noted.
MANAGING ASBESTOS IN BUILDINGS (AHERA MANAGEMENT PLANNER)

ABOUT: This course is offered during the same week as the AHERA Inspector course and provides students with accreditation as Management Planners. Students must earn a grade of 70% or better on the AHERA accrediting exam to receive a certificate of course completion. Those passing the exam will receive a photo identification cards as an AHERA accredited Management Planner.

AUDIENCE: Those responsible for the development or supervision of management plans for asbestos identified buildings, architects, industrial hygienists, engineers or others with related backgrounds.

FEATURES:
• Evaluation and interpretation of survey results
• Hazard assessment
• Legal implications
• Evaluation and selection of control options
• Roles of other professionals
• Developing an operations and maintenance plan
• Regulatory review
• Record keeping
• Assembling and submitting management plans
• Financing abatement actions

REGISTRATION NOTE: Proof of AHERA inspector accreditation must be provided with registration.

DURATION: 2 days
COST: $850
CEs: 33.5

2023 DATES:
June 8 - 9
Oct. 19 - 20

In-person courses are held at Rutgers Center for Public Health Workforce Development unless otherwise noted.

Photo credit: Laura Warne
ANNUAL REFRESHER FOR AHERA INSPECTORS AND ANNUAL REFRESHER FOR AHERA MANAGEMENT PLANNERS

These courses are scheduled on the same day: AHERA Inspector Refresher is offered in the morning; AHERA Management Planner Refresher is offered in the afternoon.

ANNUAL REFRESHER FOR AHERA INSPECTORS (AM SESSION ON DATES LISTED)

ABOUT: 40 CFR 763 (AHERA) requires a one-half day annual refresher course for accredited inspectors. Students earn a one-year extension of accreditation.

ANNUAL REFRESHER FOR AHERA MANAGEMENT PLANNERS (PM SESSION ON DATES LISTED)

ABOUT: AHERA-accredited management planners seeking to extend accreditation for one year must first take an inspector refresher course, such as Annual Refresher for AHERA Inspectors (described above). One-year extension of management planner accreditation is provided upon the completion of this course.

REGISTRATION NOTE: Documentation of accreditation as inspector and management planner and proof of the inspector refresher course, if not awarded through the Rutgers SPH, must be provided with registration. Please bring your photo ID to class (For online courses, coordinator will request a copy). NYS exam score of 72% required.

DURATION: 1/2 day (Inspector only) or 1 day (Inspector and Management Planner)
COST: $150 each course
PE Contact Hours:
Inspector Refresher: 4.0
Management Planner Refresher: 4.0

2023 DATES:

Jan. 30 VIRTUAL
Feb. 23 IN-PERSON
Mar. 23 VIRTUAL
April 13 VIRTUAL
May 9 IN-PERSON
June 15 VIRTUAL
Sept. 12 IN-PERSON
Oct. 12 VIRTUAL
Nov. 16 VIRTUAL
Dec. 12 VIRTUAL

NEW YORK/NEW JERSEY OCCUPATIONAL SAFETY AND HEALTH CENTER

= virtual      = in person      = hybrid

Very nicely done.
Didn't feel like a moment of my time was wasted today.
Very meaningful interaction - THANK YOU!!
NEW JERSEY ASBESTOS SAFETY TECHNICIAN

ABOUT: Through lectures, demonstrations and hands-on experience, this course focuses on New Jersey Subchapter 8, Subcode NJAC 5:23-8 and the duties and responsibilities of an asbestos safety technician. This course is mandatory for those desiring certification as a New Jersey Asbestos Safety Technician (AST). Those persons desiring AST certification may contact the New Jersey Department of Community Affairs (NJDCA) regarding prerequisites and full requirements. Please contact Tex Falajiki at (609) 633-6224. This course fulfills NJDCA training requirements. State exam must be taken within one year of this course.

AUDIENCE: Mandatory for those planning to work as asbestos safety technicians, abatement project monitors or others who supervise abatement projects, commercial building managers, safety professionals and industrial hygiene consultants.

FEATURES:
- Review of NJ Subchapter 8
- Microscopy air sampling data and results
- NIOSH Manual of Analytical Methods
- Transmission electron microscopy
- Negative air pressure systems
- Inspection check lists
- Record keeping
- Asbestos abatement
- Asbestos transport and disposal regulations
- Confining and minimizing airborne fibers

DURATION: 2 days
COST: $395

2023 DATES:
Jan. 24 - 25  IN-PERSON
June 21 - 22  IN-PERSON
Sept. 18 - 19  IN-PERSON

In-person courses are held at Rutgers Center for Public Health Workforce Development unless otherwise noted.

TRAINEE FEEDBACK
The instructor kept everyone engaged and made it relatable to real life too!
ASBESTOS SAFETY TRAINING FOR CUSTODIAL AND MAINTENANCE PERSONNEL (OPERATIONS AND MAINTENANCE)

ABOUT: This course provides trainees with hands-on practice and an in-depth knowledge of asbestos, work practices, regulatory information and personal protective equipment. Using lectures, discussions, videos, demonstrations, and hands-on workshops, this course satisfies the requirements relative to Asbestos Safety Training (Operations and Maintenance) for US EPA 16-hour training requirements as stated in 40 CFR 763 (AHERA) and 29 CFR 1926.1101 Class III Training. This course will also satisfy New Jersey, New York State, and New York City training requirements.

AUDIENCE: Maintenance workers, custodial staff, trades personnel, and others who may have to disturb asbestos-containing materials in buildings, while working, as well as other persons responsible for other asbestos control.

FEATURES:
- Developing an operations and maintenance program
- Background, history, and uses of asbestos
- Abatement equipment/procedures
- Operations and maintenance procedures
- Personal protective equipment
- Glovebag removal procedure
- Health effects of asbestos exposure
- Clean-up and disposal of asbestos-containing materials
- Asbestos regulations
- Operations and maintenance hands-on workshop

DURATION: 2 days
COST: $395

2023 DATES:
Mar. 14 - 15  IN-PERSON
June 13 - 14  IN-PERSON
Nov. 1 - 2  IN-PERSON

In-person courses are held at Rutgers Center for Public Health Workforce Development unless otherwise noted.
ASBESTOS OPERATIONS AND MAINTENANCE REFRESHER

ABOUT: This course provides a review of techniques covered in the initial operations and maintenance course, and includes lectures, discussions, and hands-on training. It has been designed to satisfy the requirements outlined in OSHA 29 CFR 1926.1101.

AUDIENCE: Individuals renewing their operations and maintenance certificates in accordance with the requirements outlined in OSHA 29 CFR 1926.1101.

FEATURES:
- Health effects of asbestos exposure
- Smoking cessation
- Current federal and state regulations
- Personal protective equipment
- Review of work practices

REGISTRATION NOTE: Certificate of initial or most recent refresher training must be provided, if not awarded through the Center.

ASBESTOS SAFETY TRAINING FOR CONTRACTORS-SUPERVISORS REFRESHER

ABOUT: This course offers a review of major topics in initial asbestos abatement training and also provides an update on regulatory changes and the latest removal techniques and equipment.

AUDIENCE: Those seeking to renew their licenses and permits as asbestos contractors/supervisors or workers

FEATURES:
- Health effects of asbestos exposure
- Current federal and state regulations
- Personal protective equipment
- Review of work practices
- State-of-the-art asbestos abatement procedures
- Legal responsibilities and liabilities
- Effective worker supervision and air monitoring

REGISTRATION NOTE: Certificate of initial or most recent refresher training must be provided, if not awarded through the Center.

ASBESTOS SAFETY TRAINING FOR WORKERS-HANDLERS REFRESHER

DURATION: 1/2 day
COST: $195

2023 DATES:
April 12 ✉️ VIRTUAL
Sept. 14  ⚡ IN-PERSON

In-person courses are held at Rutgers Center for Public Health Workforce Development unless otherwise noted.

The MPH degree in Occupational Safety and Health prepares students for a challenging career in reducing workplace risks. Every sector of our nation’s and state’s workforce relies on dedicated safety and health professionals to keep workers safe from occupational hazards and natural and man-made disasters. Our MPH program combines industry leading best practices with leadership from our distinguished faculty and experienced industry practitioners from around the New Jersey/New York region to create a unique program rooted in the fundamentals of public health and safety science.

The 45-credit OSH concentration, offered through the Environmental and Occupational Health and Justice (EOHJ) department, prepares graduates to effectively manage workplace safety and health hazards in diverse work environments. Students are prepared to handle challenging positions in occupational safety, health and management in a number of industries including manufacturing, construction and government service.

**BENEFITS OF AN MPH IN OCCUPATIONAL SAFETY AND HEALTH**

- Convenient schedule of courses to meet the needs of the working professional
- Graduates enhance their ability to anticipate, evaluate, and control hazards within the workplace to protect the health and safety of their workers
- Gain guidance and perspective from accomplished faculty and industry leaders through course work and a practicum
- Learn how to design and then apply regulatory-compliant programs to address unique work environment safety and emergency response issues.
- Learn how to prepare for the Registered Environmental Health Specialist (REHS); Certified Safety Professional (CSP); and/or Certified Industrial Hygienist (CIH), exams, which are separate from earning a graduate degree.

ABIH Certification Maintenance Points (CM)
Training courses may be available for ABIH CMs. Please see ABIH.org.

Continuing Medical Education (CME)
Rutgers, The State University of New Jersey is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Certified Health Education Specialist (CHES)
The Rutgers SPH Center for Public Health Workforce Development is designated as a provider of Category I Continuing Education Contact Hours in health education by the National Commission for Health Education Credentialing, Inc.

New Jersey Professional Development Hours (PDH)
PDHs have been previously awarded for many of our training courses by the Division of Consumer Affairs - State Board of Professional Engineers. Please contact their office at 973-504-6460 for questions about submitting PDHs from your training.

New Jersey Public Health Contact Hours (CE)
The Rutgers School of Public Health has been approved by the New Jersey Department of Health as a provider of New Jersey Public Health Continuing Education Contact Hours (CE).

Participants who successfully complete approved educational programs will be awarded New Jersey Public Health Continuing Education Credit Hours (CE). The number of credits awarded for each course will be in compliance with the New Jersey Public Health Continuing Education Providership Program policies and procedures.

Nurses Contact Hours
Rutgers, The State University of New Jersey is an approved provider of continuing nursing education by the New Jersey State Nurses Association, an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation.

Safety Professionals
Our course offerings may meet the Board of Certified Safety Professionals (BCSP) criteria for recertification. Contact BCSP for more information at (217) 359-9263 or www.bcsp.org/recertification.

Professional Engineering Contact Hours (PE)
The Rutgers School of Public Health – Center for Public Health Workforce Development has been approved as a sponsor of continuing education for professional engineers in New York State. The State Board of Engineering and Land Surveying through The University of the State of New York has approved our training as of 12/01/2007 for contact hours in those courses with “PE Contact Hours” listed.

*Please Note: NYS licenses can only receive credit for refresher courses once every three years. Trainees are prohibited from taking the refresher course at the same time as the original course.
All course instructors are selected from industry, academia, and the public sector to provide instruction in specific subject matter for each course. Course directors also serve as instructors for many of the courses offered through the Center for Public Health Workforce Development.

GAIL BECKER, PhD, CIH, is a Professor in the Department of Natural Sciences at Middlesex College and an Adjunct Professor in the Rutgers School of Public Health. Dr. Becker has over 25 years of experience in health and safety in the pharmaceutical industry. This includes ergonomics program development and implementation — at the site and corporate level and ergonomic risk assessment. Dr. Becker is a Diplomate of the American Board of Industrial Hygiene and is certified in Comprehensive Practice.

THOMAS J. BUTLER, PhD, RRT, RPFT, was a professor of science at Rockland Community College and science coordinator of the Sam Draper Mentor/Talented Student Honors Program. He is a registered respiratory therapist and registered pulmonary function technologist. Dr. Butler has over 30 years' experience with pulmonary function testing and its related equipment in hospital, physician's office, and occupational settings.

DENIS CRAYON, CHST is the President of Experience Safety Institute, LLC providing health & safety services to a myriad of clients with primary focus on OSHA Construction and General Industry safety. He has extensive experience with over 25 years in the field as a licensed well driller on superfund, brownfield, and hazardous waste sites throughout the tristate area. He is the current president of the New Jersey Ground Water Association and a director for the National Ground Water Association to advocate for sustainable and resilient groundwater.

MICHAEL GOCHFELD, MD, PhD, is a Professor Emeritus in the Department of Environmental and Community Medicine, Rutgers Robert Wood Johnson Medical School, and co-director of the Occupational Health Task Group for the Consortium for Risk Evaluation with Stakeholder Participation. Board certified in occupational medicine, Dr. Gochfeld also serves on the NJ Department of Health Surveillance Task Force, American Legion Science Panel on Veteran Health and chairs the Academic Section of the American College of Occupational and Environmental Medicine.

JOHN M. MALOOL, MS, CHMM, CFPS, has held positions in federal and local government dealing with hazardous waste site cleanups. Mr. Malool has vast experience in hazardous materials emergency response. He serves as the Fire Chief in Ridgefield Park, NJ. He served as a National Branch Chief in the Marine Safety & Environmental Protection Department, USCGA. He holds a Master Mariner License issued by the US Coast Guard.

HASSIM MOHAMMED, MS, has over 25 years of experience as a safety professional in New York City. His expertise includes fire protection, construction safety management, incident investigation, and conducting training related to emergency management.

LINDA MONACO has over 20 years of experience as a safety consultant and is a dedicated occupational safety instructor in the New York and New Jersey area. She currently conducts training classes for numerous construction contracting firms and provides training classes to the NYC Dept of Buildings, City Tech Academy for Construction and Suffolk Community College. Her background includes General Industry and Construction safety. She holds certifications for Asbestos Inspector, Lead Risk Assessment, Home Energy Rating, Mold Inspector and Occupational Hearing Conservation.

MARGARET “PEG” NEVILLE, BA, REHS, is a Senior Environmental Scientist and Principal Health and Safety Consultant for HazTek Safety Management. Ms. Neville has been a researcher, instructor and industrial hygienist in the professional areas of general industry, construction and marine environments. She holds multiple permits and licenses in Lead and Asbestos safety disciplines.
MARK DROZDOV, MS, SSM, FSM, BSI, RSO, CAI, CMA, GPRO is a Subject Matter Expert (SME) in the Best Practices addressing the Significant Environmental Health & Safety and Sustainability (EHSS) Issues. For three decades, Mr. Drozdov has executed a diverse range of notable projects in EHS worldwide, including testing, HazMat remediation engineering, industrial hygiene, risk assessment, hazards identification, compliance audits, industry training curriculum development and implementation, and certification.

DOUGLAS PASTORE, MS, CIH, is Vice President of Safety, Health and Environment for L’Oreal USA. He has over 30 years of Safety, Health and Environment experience within various corporate, manufacturing and R&D areas. Much of this experience is in Occupational Health and Safety, IH, loss control management, emergency preparedness and chemical emergency response. He serves as adjunct faculty at the Rutgers School of Public Health.

MICHAEL PRESUTTI, BA, possesses substantial skill and experience in assessing and effectively organizing, writing and implementing environmental safety and health programs in both the public and private sectors. He brings over 30 years of field experience to the classroom and is also a published author and newspaper columnist. His clients include some of the world’s largest corporations and utilities and he often contributes subject matter expertise to non-profit institutes and the media.

ALEJANDRO “ALEX” RUIZ, MS, CIH, CSP, CHMM, SMS, CIT, CHST, is the Executive Director of EHS and the University Safety Officer at Rutgers, The State University of New Jersey. He has over 20 years’ experience in the EHS field and has an appointment as an adjunct professor at the Rutgers School of Engineering. Alex earned his undergraduate and graduate degrees at New Jersey Institute of Technology, with a BS in Electrical Engineering & Technology, MS in Safety Engineering and an MS in Industrial Hygiene. He currently holds credentials as a Certified Industrial Hygienist, Certified Safety Professional, Certified Hazardous Materials Manager, Certified Instructional Trainer, Safety Management Specialist, Construction Health and Safety Technician and an Authorized OSHA Construction Outreach Trainer.

DIEGO SUAREZ has over 20 years of occupational safety and health and HazMat training experience. He is an Asbestos and Lead approved instructor through the New Jersey Department of Health and through the New York State Department of Health as an Asbestos Instructor. He also instructs USEPA approved lead training. Mr. Suarez has US National Safety Council certifications for First Aid, CPR and AED. His consulting work in the environmental remediation field includes workplace safety assessments, sampling and monitoring. Mr. Suarez worked in various projects and sites including military facilities, mass transit, hospitals, utilities companies, laboratories, and public housing and manufacturing plants.

PHILIP A. TAYLOR, MS, OHST, CHST is a NYC Site Safety Manager with over 35 years of experience as a health and safety professional in both the public and private sector. Mr. Taylor is an OSHA authorized construction industry and disaster site worker trainer who provides a broad range of construction safety training for public agency, educational institutions, and private industry clients. During his career, Mr. Taylor managed safety operations at large scale and residential construction projects; prepared safety plans, procedures and guidelines, and participated in numerous NY and NJ emergency responses.

ANTHONY VALENTE, BA, ESQ. has over 40 years of experience in occupational safety and health for the construction, disaster site, maritime, general industry, fire protection, life safety, electrical, industrial safety and security. He is an OSHA- Authorized Outreach Trainer in Construction, the General Industry, Disaster Site Worker, and the Maritime Industry. Mr. Valente also brings a wealth of experience from his time with the Department of Labor into the classroom.

FRANK WARTINGER, Au.D is an audiologist as well as a active composer, producer, recordist, mixing engineer, and multi-instrumentalist. Dr. Wartinger obtained his graduate degree in Audiology from Salus University, studied at Purchase Conservatory of Music in the Studio Production Program. Dr. Wartinger was a clinical specialist in audiology at the Children's Hospital of Philadelphia, served as the Director of Communications of the National Hearing Conservation Association, and is an active member of the NHCA Music Induced Hearing Disorders Task Force. Frank is Board Certified by the American Board of Audiology and is a fellow of the American Academy of Audiology.

MICHAEL ZACHOWSKI, MS has extensive experience in environmental and occupational safety and health working in industry and providing training for over 30 years. He facilitates emergency response training for the Rutgers hazardous materials training program.
From Route 287 North:
• Take Route 287 to Exit 10
• Turn left onto Davidson Avenue
• Turn left onto Atrium Drive

From Route 287 South:
• 287 South to Exit 10
• Stay straight to go onto CR-527/Easton Avenue
• Turn left to take the CR-527 North ramp towards Davidson Avenue
• Turn left onto Davidson Avenue
• Turn left onto Atrium Drive

From Route 78 East & West:
• Take Route 78 East to Exit 29
• Bear left to take the ramp for Route 287 South
• Follow above directions for Route 287 South

From Route 202/206 North and South:
• Take Route 202/206 to 287 South
• Follow the above directions via Route 287 South

From Route 22 East and West:
• Take Route 22 to the Mountain Avenue ramp toward Bound Brook (keep right at fork)
• Turn left onto CR-607/East Main Street
• Enter next traffic circle and take first exit onto South Main Street
• South Main Street becomes CR-527/Easton Avenue
• Turn right onto Davidson Avenue
• Turn left onto Atrium Drive

Closest Train Station: New Brunswick Station (NJ Transit / Amtrak) (6.6 miles)

• DASH 851 - Davidson Avenue Shuttle - serving New Brunswick, Bound Brook and Franklin
• DASH 852 - Davidson Avenue Shuttle - serving New Brunswick, Bound Brook and Franklin

* Fares and schedules are subject to change. For most up to date information, please refer to the DASH website

Closest Major Airport: Newark Liberty International Airport (30 miles)
The Center for Public Health Workforce Development has prepared the following list of area hotels out of convenience for traveling students. At the time of printing, these hotels were offering discounted rates to Rutgers students. Inclusion in this list does not imply endorsement or recommendation by the Center for Public Health Workforce Development.

All hotels are within a short driving distance to area malls, restaurants and movie theaters; please contact each hotel for information about area attractions. Van service may be available from the hotels to the Center.

Please indicate you are enrolled in a Rutgers course and request the Rutgers rate when booking. Be sure to ask hotel management to explain everything included with the room rate.

Please register online at http://rutgerstraining.sph.rutgers.edu (preferred) or by mailing/faxing/emailing a completed enrollment form for each registrant.

Payment is due ten days prior to any course, and may be made by check, purchase order, Visa or MasterCard. Checks and purchase orders should be made payable to Rutgers School of Public Health Center for Public Health Workforce Development.

Registration is not considered final until full payment is received. Any questions about courses should be directed to our Registrars. Please register early as class sizes are limited.

Confirmations will be sent to those who register at least 10 working days prior to the first day of each course. Confirmations will include course date(s), location, directions, start time and end time. If you believe you are registered, but have not received a confirmation, please verify your place in class by contacting the Registrar either by telephone, fax or email.

Note: Course fees and dates are subject to change. Course locations and times vary. Please consult your confirmation letter for this information. Students receive a course manual and/or other written materials. Certificates of Completion are awarded to students who successfully complete all requirements and Continuing Education Units (CEUs) are awarded on request.

Students are responsible for the purchase of meals and refreshments. Any licensing or credentialing fees are also the responsibility of the student.

**Rutgers School of Public Health Code of Professional Conduct**

Enrollment at the Rutgers School of Public Health is a privilege and not a right. All students enrolled in the School are expected to behave in a professional manner as they pursue their courses, certificates, and degrees. As an institution dedicated to improving the health of diverse populations, the School expects students to treat all people with respect, regardless of their race, color, creed, religion, sex, sexual orientation, national origin, age, physical or mental disability, military status or marital status.

The School reserves the right to require withdrawal of any student whenever necessary to maintain standards of scholarship or professional conduct.

**Withdrawal | Cancellation | Refunds | Transfer**

Rutgers School of Public Health Center for Public Health Workforce Development reserves the right to cancel or reschedule courses due to unforeseen circumstances. We occasionally have inclement weather and courses may be postponed or rescheduled. The safety of our students and staff is our primary concern.

If a course is canceled by Rutgers, the students will have the option to transfer to another course, have their tuition held in reserve and applied to a later date, or receive a refund. Rutgers is not responsible for travel related expenses incurred by the student in the event of unforeseen delays, postponement or cancellation.

All course cancellations by a registrant must be received in writing to rutgerstraining@sph.rutgers.edu.

Course registration fees will be refunded in full if cancellations are received 11 or more working days before the program start date. Any cancellations or changes by the registrants made within 10 working days of the program start date will be charged a $100 processing fee.

Students are allowed a one-time transfer to another session of the same course held virtually or in Somerset, New Jersey. The transfer request must be sent in writing to rutgerstraining@sph.rutgers.edu 10 working days prior to the start of the course. Each additional transfer will be subject to a $50 processing fee.

All refunds are provided by check. Please allow for 4-6 weeks processing time.

**Disclosure Policy**

The “Disclosure Policy” of Rutgers requires that faculty participating in a CME activity disclose to the audience any relationship with a pharmaceutical or equipment company that might pose a potential, apparent, or real conflict-of-interest with regard to their contribution to the program. Rutgers reserves the right to modify the program content, program faculty and program activities, and reserves the right to cancel this program, if necessary.

Students requesting a replacement copy of a certificate or document will be charged a $15 processing fee to be payable by check, Visa, or MasterCard.
