Managing & Controlling Hazards Associated with Cranes, Derricks, and Hoisting on Multiple Employer Worksites.

Almost all construction worksites in large urban areas require cranes, derrick, and hoisting equipment. Lifting operations are among the most critical operations on a construction worksite and require comprehensive planning as errors will lead to tragedy. This program will guide trainees through the fundamental hazards associated with cranes, derricks, and hoisting activities and their hazard controls.

Benefits:

1. Become aware of the forces that act upon lifting and moving loads
2. Recognize hazards associated with cranes, derricks, and hoisting activities
3. Identify the responsibilities of responsible parties
4. Review lifting logistics plan and hazard analysis

Topics Covered

- Worker Rights
- Lessons learned from Crane Incidents
- Responsibilities of Controlling Employers and Controlling Entities
- Hazards Associated with Cranes & Derricks
 - Ground Conditions
 - Overturning and Tipping
 - Crushing/Pinch-Points
 - Struck-by
 - Weather and Environment
 - Side Loading
 - Duty Cycle Operations
 - Collision Communication; Human Errors & Calculations
 - Level & Plumb
 - Logistics, Assessing, Lift Plan Checklists
