Protecting Workers from Infectious Diseases: Applying Injury and Illness Prevention Programs to Biological Hazards (Concentrating on COVID-19)

SARS-CoV-2 has led to the worldwide disruption of businesses and lives. Identifying infectious agents at work sites and effectively protecting workers is essential for business continuity. This one-day course outlines employer responsibilities to safeguard workers from hazards associated with COVID-19. Participants will apply safety and health management programs to identify and control infectious diseases.

Topics Covered

- OSH Act and employer responsibilities
- Core elements of Safety and Health Management Programs
- COVID-19 and biological hazards
- Hierarchy of controls applied to infectious diseases
- Effective communication strategies
- Total Worker Health as a hazard control mechanism

Who should attend

Safety and health trainers, managers, and supervisors who are responsible for protecting workers from infectious diseases at the worksite.

Courses will be offered through Zoom

Instructor: Michael Presutti

MICHAEL PRESUTTI, is well known in the New York/New Jersey safety and health community. Mike possesses substantial skill and experience in assessing and effectively organizing, writing and implementing environmental safety and health programs. He brings over 25 years of field experience to the classroom.
